OBJECTIVE

Software Developer with hands-on experience in web development using MERN stack and Java Spring Boot, along with industry exposure as a Software Trainee. Skilled in building scalable web applications, APIs, and working with modern databases. Seeking an opportunity to contribute to real-world projects while continuously enhancing technical expertise.

SKILLS AND INTERESTS

Programming Languages	Java, Python, C
Frontend	HTML5, CSS3, JavaScript, TypeScript, React.js, Vue.js
Backend	Node.js, Express.js, Spring Boot
Database	SQL, MongoDB, Elasticsearch
Tools & Platforms	Git, GitHub, Postman, Figma, Google Sheets, Google Apps Script, Docker

EXPERIENCE

Software Trainee

JPBP Offshore Private Limited (Restaurantware) | Feb 2026 – Mar 2026

- Trained in full-stack development using HTML, CSS, JavaScript, TypeScript, and Vue.js
- Developed backend components using Java and Spring Boot
- Worked with SQL and Elasticsearch for data handling and search optimization
- Automated workflows using Google Apps Script and Google Sheets
- Performed software testing and QA to identify and resolve bugs
- Collaborated with team members on internal product modules

PROJECTS

Notes App | MERN Stack

- Built a **full-stack CRUD application** with authentication, tagging, and search functionality.
- Optimized data retrieval using efficient MongoDB queries and React state management.
- Designed a responsive UI for seamless user experience across devices.
- [GitHub Repo](#) | [Live Demo](#)

iHub - Idea Bidding Platform | Spring Boot, MySQL, Elasticsearch, React, Docker

- Built a platform for idea creators and investors with features like idea posting, bidding, and auction.
 - Developed REST APIs for idea management, bid handling, search, filtering, and real-time auction updates.
 - Integrated MySQL for transactional and Elasticsearch for efficient keyword-based search and discovery.
 - Designed and implemented a React-based frontend for an interactive user experience.
